Allpro Flea Treatment Prep-List

Thank you for the opportunity and confidence shown in ALLPRO to provide flea control on your home. In order for us to provide you the professional service that you desire, we will need your cooperation.

Before we arrive to treat the home, we request that you....

1. Remove all toys , decorative items, pillows, and other items from floors so all areas of the floors can be treated.
2. Remove all articles from under beds, on closet floors, and under furniture. These are prime harborage areas and the success of the treatment will be dependent upon the areas accessible for treatment.
3. Vacuum all floors and upholstered furniture to remove animal hair and other organic matter.- This is **VERY** important to provide quicker control of infestation & reproduction.
4. Remove or cover all fish tanks and unplug filters.
5. Cover all exposed foods including pet foods.
6. Get pets dipped or treated by a veterinarian during the treatment.
7. Turn off heater/AC during treatment.
8. Be prepared to leave the house for a min. of 3 hours (humans and pets) during and after treatment.
9. Keep off all treated areas (carpets & furniture) until dry .
10. Vacuum all floors, cracks at baseboard and upholstered furniture for several days after treatment. (All floors includes kitchen, bath, laundry room and all closets.)
11. Remove the vacuum cleaner bag after vacuuming and dispose of it outside.

Please Remember your help is essential in our success in achieving the flea control you desire. It is not unusual to see live fleas for 7-10 days after treatment.
